Cyber Resilience Act (CRA)

We comply with the requirements of the EU Cyber Resilience Act (CRA)

To ensure safe and secure use of our product, we comply with all requirements of the EU's upcoming cybersecurity regulation: the Cyber Resilience Act (CRA). This means that:

▶ Security from the start

Our product is developed according to the principles of security by design and security by default. All communication channels are secured, and only necessary ports and services are active.

▶ Automatic security updates

We provide OTA updates (over the air) for at least 5 years from the date of purchase, ensuring that your device is always protected against new threats.

▶ Full transparency of software components

Where third party libraries and external dependencies are included in our products, these are documented in a Software Bill of Materials (SBOM) to ensure traceability and transparency in the software composition.

▶ Strong authentication and access control

The product requires you to set a secure password during initial setup, and all data transmission is encrypted according to industry standards (TLS).

▶ Security tested

Each product is tested for cybersecurity risks. We perform internal security reviews as well as automated vulnerability scanning.

▶ Certified and documented

The product is CE marked through self declaration in accordance with the requirements of the Cyber Resilience Act. The technical documentation demonstrates how these requirements are fulfilled.
